Optical fiber connector - Wikipedia

An optical fiber connector terminates the end of an optical fiber, and enables quicker connection and disconnection than splicing. The connectors mechanically couple and align the cores of fibers so light can pass. Better connectors lose very little light due to reflection or misalignment of the fibers. In all, about 100 different types of fiber optic connectors have been introduced to the LC Connectors, Adapters and Cable Assemblies - Molex

LC Connectors, Adapters and Cable Assemblies meet the growing demand for small form factor, high-density fiber optic connectivity with simplex, duplex, singlemode and multimode options LC connectors reduce space requirements by 50%, over 2.50mm ferrule connectors, without sacrificing performance.
