[1/2 versus Full Fresh Water Cooling Systems - MerCruiser](#)
Marine Fresh Water Cooling systems are similar to the cooling system in an automobile however rather than a radiator they utilize a heat exchanger, and rather than using air to remove the heat generated by the engine they use lake or ocean water. The heat exchangers are constructed by inserting a tube bundle of small tubes, maybe 150 or more, into a single large tube approximately 4-6

Fresh Water Cooling Systems Engines are systems with constantly shifting parts and functions that have to be monitored and sustained for the best possible performance. With that being said, monitor cooler kits are a must for any serious engine owner.

Marine Closed "Freshwater" Cooling Systems

Marine Closed "Freshwater" Cooling systems is a bit of a misnomer as they do not actually circulate freshwater but an antifreeze/water mixture. Unlike in a car where the antifreeze/water circulates through an air-cooled radiator, a closed cooling system uses lake or ocean water flowing through a heat exchanger to remove heat from the engines cooling water/antifreeze mixture.
