Graboid - Wikipedia

The Graboid is a fictional species of sandworm that acts as the main antagonist of the Tremors franchise. The creature made its debut in the 1990 film Tremors (although the name "Graboid" was only mentioned briefly), and reappeared in its five sequels and the Tremors television series.

What is an invertebrate?

All insects are invertebrates! All living things are placed into groups depending on common characteristics. The animal kingdom is informally divided into two groups, the vertebrates and invertebrates.

kidstonmill.org.uk

In some other invertebrate species where only one sex was found, it is likely that the other is adult only in certain

months. The response to this constraint is outlined in Section 2.1.4. The response to this constraint is outlined in Section 2.1.4.
