Motion Preservation Surgery of the Spine: Advanced ...
New motion-preserving devices are revolutionizing spine surgery but the learning curve for these operations is steep, and great attention must be given to patient and device selection and the perfect execution of each procedure.

Motion Preservation Surgery of the Spine: Advanced ...
fective, this surgery is not without adverse outcomes, including development of degenerative disk disease at an adjacent level, pseudoarthrosis, facet arthropathy, spondylolysis, and spondylolisthesis. The goal of motion preservation surgery is to closely replicate normal spinal biomechanics, the result of which should, in theory, be the limitation of complications.
